Claims 17-20 and 22-25 and 27-30 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. The specification as filed does not disclose that "m" and "n" are positive integers and this limitation is therefore new matter.

Furthermore the term "positive integers" is unlimited as to the implied molecular weight and applicants specification does not enable production of materials with infinite molecular weight.

Applicant's arguments filed 4-12-06 have been fully considered but they are not persuasive. Applicants argue that all chemists understand that these designations are equivalent to positive integers. Firstly however it is not clear what applicants are referring to by "these designations". If applicants are referring to "m" and "n" in their formula, applicants are requested to point out where the prior art teaches their formula at all. The issue in the instant case is the value of "m" and "n" for the presently claimed materials and noting in the instant specification as filed indicates that applicants intended that "m" and "n" were to be unlimited (except in that they are positive integers).

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP

Art Unit: 1711

§ 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
